

Workshop 3 - Genetics: Reading the molecular parchment record

This workshop will aim to address the following questions...

Can we use genetics to resolve the historical and or geographical origins of parchment?

How far can we exploit the genetics of modern cows, sheep and goats in the study of manuscript parchments?

Can we use parchment to calculate the social and economic significance of herds and their composition and management?

Where: Natural History Museum of Paris (France)

When: Saturday 19th October 2019
